CURIO

Great music, properly licensed.
Set up and playing in a week.

THE PROBLEM

Playing Spotify in your venue? It isn't licensed for business.

Personal streaming services aren't licensed for commercial use. Venues need a licensed playback platform alongside the appropriate OneMusic licence.

Easy to overlook. Even easier to get right.

HOW IT WORKS

We set it up.
You just press play.

01. CURATED.

Music selected from Curio's signature playlists, matched to your venue and atmosphere.

02. SCHEDULED.

Playlists mapped to your trading hours, moving with the room from open to close.

03. LICENSED.

Commercial playback through Soundtrack, with guidance on your OneMusic licence.

04. HANDED OVER.

A simple remote onboarding for your team, ready to run independently from day one.

COMMERCIALLY LICENSED PLAYBACK

We curate the sound.
Soundtrack takes care of playback.

Curio partners with Soundtrack, a commercially licensed music platform built for business. Play music from your phone, tablet, computer or dedicated player, with automated scheduling and easy control. No additional hardware required.
